

Innovation for Practices that Round.

CodeHERO is a cloud-based, enterprise rounding solution for ambulatory and hospital-based specialty practices. It streamlines and optimizes clinical and billing workflows for inpatient and other out-of-office patient encounters.

All-in-One Rounding Solution

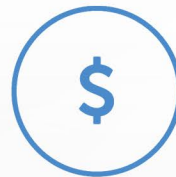

Integrated Charge Capture

Fast, efficient charge capture at the point of service reduces revenue leakage and improves practice revenue.

Care Team Coordination

Current accurate patient lists, facilitate faster sign-outs, and help providers get through rounds efficiently.

Revenue Cycle Optimization

Streamlines the billing workflow for all surgical services and rounding encounters.

Reporting and Analytics

Real-time access to insightful, actionable information improves clinical and financial results.

Physician founded, Customer driven.

At CodeHERO, we are committed to exceeding customer expectations, developing clinically impactful solutions and delivering measurable ROI. Our customers tell us they realize measurable improvements in financial results, care coordination efficiency, practice productivity, and provider and staff satisfaction.
